How the Unified Water Label
can help solve the Climate Crisis

UWLA
Unified Water Label Association

Carlos Velazquez
President, UWLA

HIGHLIGHTS

- Board re-elected by members
- Recognition alongside WELS, Watersense, within the ISO 31600
- Referenced with technical criteria within EU Green Deal/Taxonomy initiative *COMMERCIAL BENEFIT*
- Portugal's Building Regulations includes UWL criteria *COMMERCIAL BENEFIT*
- UK Energy Technology List new Shower criteria – UWL compliance *COMMERCIAL BENEFIT*

GROWTH

- 2008, 18 Brands, 800 product registrations
- 2023, 160+ Brands, 15,700 product registrations
- Fast approaching 80% of market – *WOW, THANK YOU FOR YOUR SUPPORT*

EDUCATION

- Understanding to influence choice and behaviour change from children → adults
- Plumbing courses at College level using UWL
- Consumer initiative in development with third party

KEY POINTS

- The European Commission's climate chief warned Friday that society will be "fighting wars" over food and water in the future, if serious action is not taken on climate change.
- Speaking at the Munich Security Conference, Frans Timmermans said global warming posed one of the greatest risks to security worldwide.
- Without action, Timmermans said that "there is no doubt in my mind that my kids, my grandkids will be fighting wars over water and food."

'Very precarious': Europe faces growing water crisis as winter drought worsens

Multiple governments warn of critical water shortages as heatwaves and lack of rain leave river systems depleted

Jon Henley in Paris, **Sam Jones** in Madrid, **Angela Giuffrida** in Rome, and **Philip Oltermann** in Berlin

Sat 4 Mar 2023 06.00 GMT

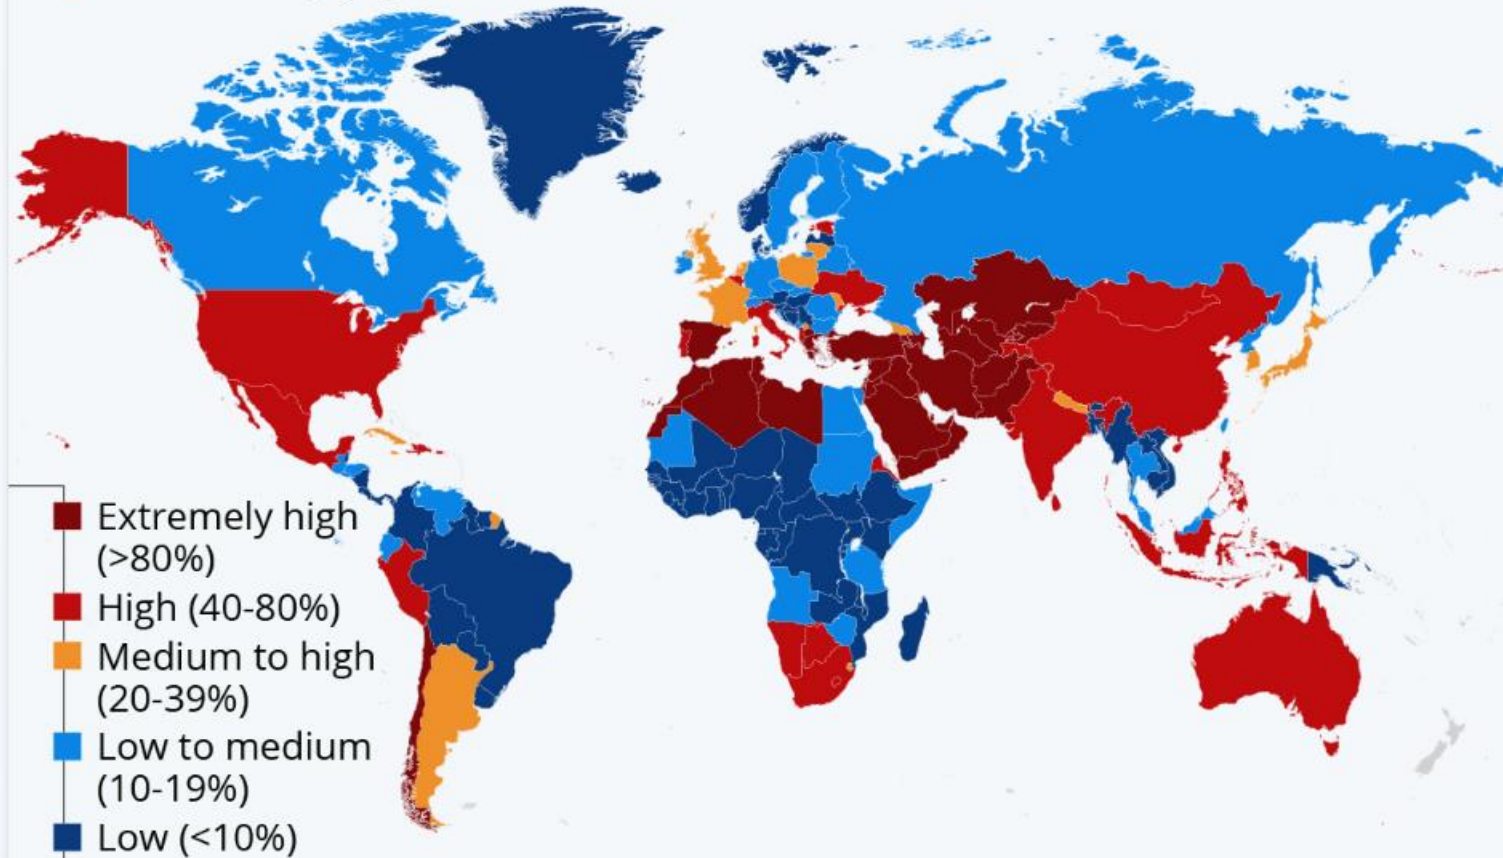

📷 Lac de Montbel, a major reservoir and boating lake in the French Pyrenees, is more than 80% empty due to exceptionally low winter rain and snow fall. Photograph: Valentine Chapuis/Getty Images

Energy

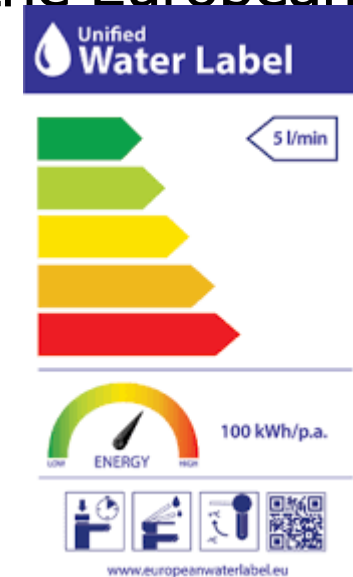

ANQIP

- ANQIP is a Portuguese technical-scientific association, non-profit, whose overall objective is to promote and guarantee quality and efficiency in building services, with particular emphasis in the building water cycle and sustainability issues.
- ANQIP launched in 2008 the Portuguese scheme for water efficiency labelling

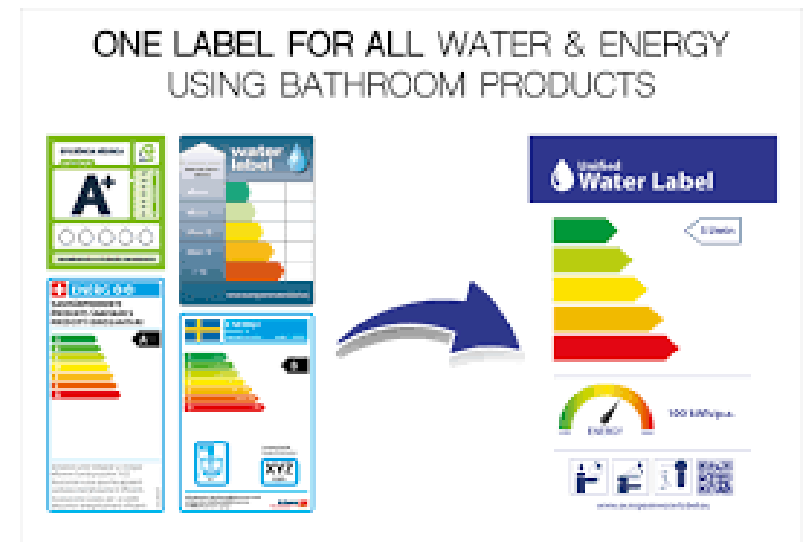

UWLA

- The UWLA is a non-profit organization that administers the Unified Water Label, an industry-driven voluntary labelling scheme for the European bathroom industry.

ANQIP and UWLA

- The UWLA and ANQIP mission is aligned via their labelling schemes, aimed at raising awareness of water and energy use for water-using bathroom products.
- The unified water labels provide guidance for the consumer on the efficiency of the product for water and energy.
- In 2019 both parties committed to aligning the schemes closer together as part of the 'Best of all' initiative.

- The ANQIP scheme includes a raft of building products with 4 main categories mirroring the UWL;
 - ❑ flushing cistern
 - ❑ shower and showering systems
 - ❑ taps
 - ❑ flush valves
- The Unified Water Label has 14 bathroom categories.

Road Map

- Technical comparison to ensure meeting one criterion meets both and aligns the efficiency grades, simplifying the process for manufacturers

CISTERNS

ANQIP Label	UWL
A++	Dark green
A+	Dark green
A	Light green
B	Yellow
C	Orange
D	Red
E	Red

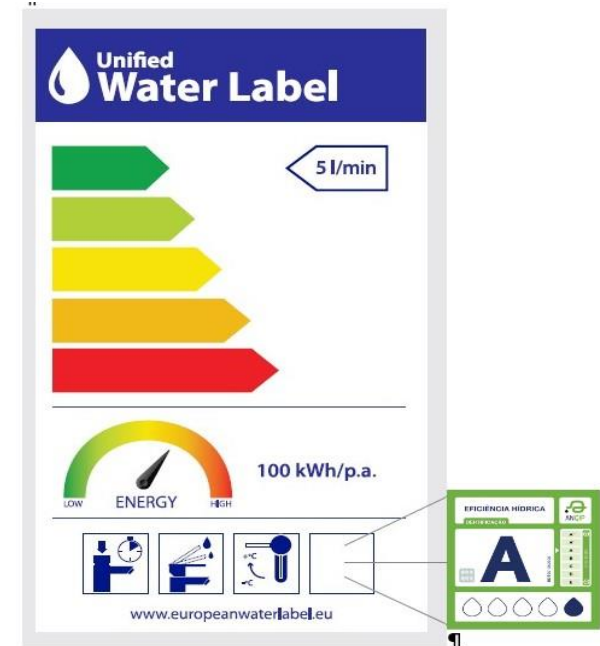

Road Map

- Registration on ANQIP for Portugal also registers on UWL
- No additional fees for Portuguese companies who are already on ANQIP – cost-effective for registrants, allowing dual registration for a period of time, moving to the Unified Water Label and a cleansing of the market – Until the end of 2023
- Utilising supporters and certification bodies in Portugal to disseminate the message

Road Map

- One certification, one label for European markets that align with government initiatives and regulation
- Support UWLA annual audit process

Transition label

Severe drought and warm winter spells affect Maghreb and Türkiye

The JRC scientists behind the report “[Drought in the Maghreb and Türkiye - February 2023](#)” suggest that the impacts on water availability, crop yield and energy use should be closely monitored.

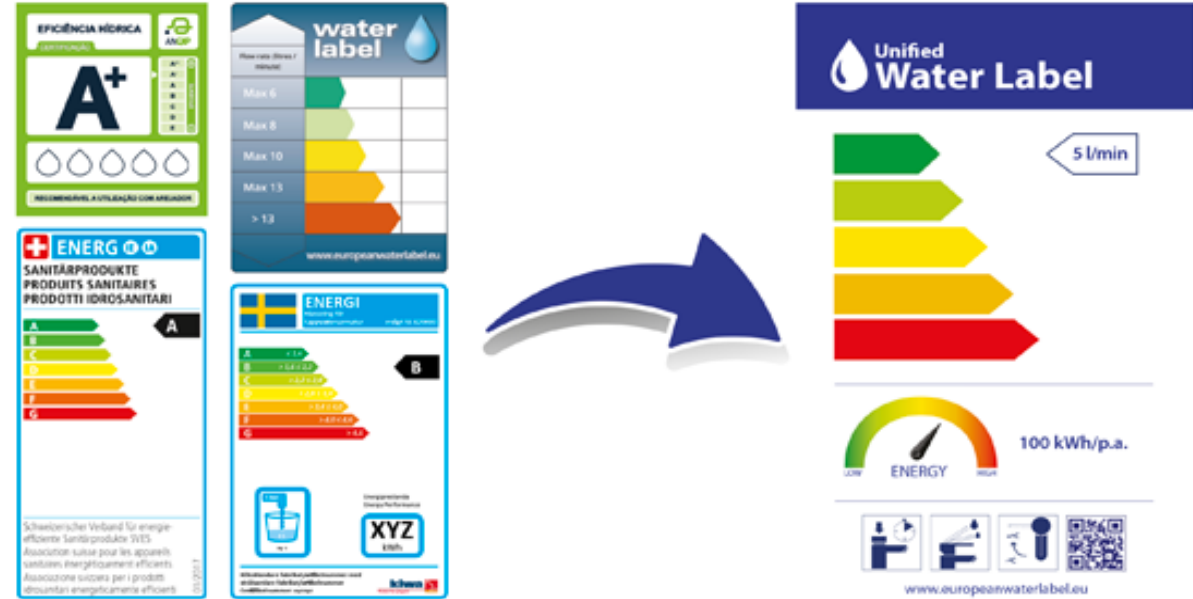

NATURE AND ENVIRONMENT | EUROPE

How to combat winter droughts and water shortages

Tim Schauenberg

03/09/2023

Warmer winters and sparse rainfall have dried up southern Europe. Water scarcity in Italy, France and other countries is threatening this year's harvests. What to do?

Thank you!

Carla Pimentel-Rodrigues (Executive Director - ANQIP)
